

GERDAU AMERISTEELTM

Calvert City, Kentucky Mill Post Consumer/Industrial Scrap Mix and Certificate of Origin

We hereby certify that steel products manufactured by Gerdau Ameristeel Calvert City are 100% manufactured in the United States of America, when so indicated on the Chemical and Physical Test Report with the statement, "This material, including the billets, was melted and manufactured in the United States of America". The steel contains a minimum of 50% post consumer content and a total recycled scrap content of approximately 99% as reported by various billet suppliers.

Exceptions: Certain Gerdau Ameristeel Calvert City products are produced from billet sources located outside of the United States of America. These heats may contain considerably less recycled content than stated above, depending on the melting process used by the billet supplier. Records of the billet source for each heat are maintained at the mill. Please contact the Calvert City Mill Quality Assurance Clerk (270-395-3129) for details on heats that do not have the "...billets...melted and manufactured..." statement on the Chemical and Physical Test Report.

Sincerely,

Gerdau Ameristeel
